Abstract

Do you need an abstract for your dissertation? Maybe you do, maybe you don't, but this is where it lives.

If you want to, you can put acknowledgements here. Thanks for all your help,
Quintin!

Education Use Consent

I hereby give my permission for this project to be shown to other University of Glasgow students and to be distributed in an electronic format. **Please note that you are under no obligation to sign this declaration, but doing so would help future students.**

4	Evaluation	5
5	Discussion and Conclusion	6

Chapter 1

Introduction

Here goes the introduction!! If you ever need to cite someone's work, it's pretty easy to do so - just like this [1].

1.1 Background and Motivation

Why do this? What's been done before? What is the motivation for redoing it?

Chapter 2

Requirements

This is where you discuss the solicited requirements for your project.

The what have, should have, could have of your project!

Chapter 3

Exerciser

Maybe here you could discuss the exerciser tool in detail. Here I discuss the developed system...

3.1 Selected Technologies

What technologies are you using and why? django, jquery, html,...

3.2 Entity-Relationship Diagram

A diagram of your database...

3.3 Wireframes

What does your system look like?

Chapter 4

Evaluation

This is where you put the results from your evaluation at the schools in. How did it go? Graphs? Numbers? Lots of nice pretty things to look at!

Chapter 5

Discussion and Conclusion

What concluding remarks do you want to make about your project? How did you think it went? What would you say are good ideas for future work?
